- Easy to use, with on-board and remote-control functions

- Simple connections to video, data, audio, mouse and monitor loop-through

- Monitor loop-through allows you to view your presentation on your desktop as well as on the screen

- 5.7 pounds easily go with you anywhere

- Control your mouse, presentation and laptop through the projector

- Extremely affordable high-resolution (XGA) solution

- 1100 ANSI lumens project bright images

HIGH-RESOLUTION AT LOW COST

For too long, price barriers kept high-tech solutions out of reach – until now. InFocus® is proud to introduce the LP™290, the projector designed to deliver true XGA performance – the native resolution that matches your XGA laptop or PC – at an affordable price. It offers all the features you need without breaking your budget. The LP290 puts high-resolution projection technology within easy reach.

PERFECT TIMING

Cost-conscious organizations have waited for an affordable and superior alternative to flipcharts, color printouts and slides, which are not only inconvenient, but demand additional expense with each revision. Using the InFocus LP290 and computer software allows you to significantly cut production expenses because your presentation can be created and updated unlimited times without additional costs.

Best of all, with the LP290 you're in control of your material at all times. Because it's instantly accessible on the computer, information can be corrected in real time – seconds before, or during, a meeting. Never get stuck showing incorrect material.

HIGH PERFORMANCE AND FULL-FEATURED EASE OF USE

The LP290 demonstrates once again why InFocus sells more projectors than any other manufacturer. Versatile and full-featured coupled with native XGA resolution and bright 1100 ANSI lumens, which let you project with the lights on. And the projector operates quietly, without disturbing fan noise.

The LP290 is also built for ease of use. It employs an intuitive icon-and-text based menu system for graphical navigation that's instantly familiar to any PC user.

The LP290 has an impressive set of features, including a zoom function for powerful emphasis, while digital keystone correction ensures that images are perfectly square, giving you the flexibility to set-up your projector anywhere.

Manual zoom and focus allow quick, easy adjustment of image size, while the short-throw lens displays a large image even in small classrooms and meeting rooms.

Best of all, at just 5.7 pounds, this compact projector is easy to take anywhere. And the LP290's portable size stretches budget dollars because it can easily stay in a dedicated room or go with you on the road.
