

# DP6500x

## Simply designed to be shared.

### EASY TO SUPPORT

New projector design with standardized keypads, menus and interchangeable remotes — easy to use, easy to share, easy to support

### COLOR-CODED CONNECTIONS

Color-coded cables with velcro straps plug into matching color-coded ports

### BRIGHT, CAPTIVATING IMAGES

2500 ANSI lumens fill the screen producing bright, captivating images

### WHISPER QUIET

35dB insure the only thing heard is your message

### PROJECTORNET™

Manage the DP6500x over your corporate network

### FLEXIBLE IMAGE PLACEMENT

The zoom lens allows a change in image size of up to 40% so images fit the screen perfectly from wherever the projector is located

# DP6500x

## WHERE SOPHISTICATED DESIGN MEETS SIMPLE CONTROL

The DP6500x was designed around a new way of thinking and it's like nothing you've ever seen before in projector design. An intuitive standardized keypad with everything users need, right on top of the projector. No need for directions, manuals, or IT support calls. With color-coded connections and cables users can connect the projector in seconds. The keypad is grouped by function and simple to use—whether users want power, source selection or fine-tuning. And for further ease of operation, users can rely on intuitive, icon-based menus—they simply scroll and select. Standardized, interchangeable remotes mean seamless projector control across all Proxima® projectors. What's more, a built-in handle makes it easy for anyone to carry the projector or switch rooms at a moment's notice. With the DP6500x, choosing to standardize on InFocus® Corporation, the worldwide leader in digital projection, couldn't be an easier choice.

## FULLY EQUIPPED AND LOADED WITH OPTIONS

The Proxima DP6500x has it all. Connect up to five sources simultaneously—2 computer, 3 video for seamless switching and simple content integration. With the optical zoom lens on the DP6500x—flexibility in image size and projector placement have never been easier. Images can be enlarged up to 40% in size with the 1.4:1 optical zoom lens—and with the digital pan/zoom users can highlight an area of the screen at the touch of a button. The DP6500x ships standard with the Conductor™

Plus remote, one of three new optional remotes to make projector control seamless. The DP6500x also ships with a new molded case that organizes the projector and accessories like a toolbox, putting an end to missing parts and cables. Using the color-coded slots for cables and parts—the user can quickly pack everything into the case. Anyone using the projector will know at a glance if something is missing.

## INTEGRATING INTO YOUR WORLD

With InFocus Corporation ProjectorNet™ software, you can command and control the DP6500x over your existing network. Designed as a snap-in to the Microsoft® Management Console, InFocus ProjectorNet provides unique control features allowing for centralized management. Troubleshoot and control projector functions such as power-off to save lamp life—all from a single PC. Reducing total cost of ownership and reducing support time spent managing multiple projectors has never been easier. ProjectorNet means instant access to all networked projectors from your server or dedicated help desk.

**SOPHISTICATED CONTROL AND COMMUNICATION**

Exclusive ProjectorManager™ control software allows projector control via the PC. Adjust/control source, color, tint, brightness and keystone quickly and easily from the computer. Users can now enhance presentation effects or even customize logos and startup screens. And should users need IT support, ProjectorManager sends a snapshot of the projector information to InFocus technical support. ProjectorManager even provides the ability to freeze the projected image for changes without distracting others looking at the screen. With a Proxima projector, users are always in control.

**DELIVERING THE FUTURE**

Users count on you to bring them the latest technology. Only Proxima delivers projectors today that are compatible with tomorrow. The DP6500x uses the newest DLP™ technology from Texas Instruments—a 0.7" DMD with Double Data Rate (DDR) chip that delivers twice the contrast ratio of other projectors in its class, yielding sharp, colorful images. The DP6500x includes cutting-edge technology that allows for future upgrades to InFocus Corporation wireless connectivity.

**SOMETHING FOR EVERYONE**

The new Proxima DP6500x will change the way your organization shares information. Users will be self-sufficient, taking advantage of easy projector setup and configuration. Everyone will benefit from the simple, standardized interface. And collaboration with the DP6500x will quickly become a vital part of every effective meeting. Outfitting your conference rooms with the right projection solution has never been easier.
